Berlin, Germany, April 2010

Dear Friends of the Peace Movement,

Dear Friends struggling against nuclear weapons,

We, in the groups, the organizations and the initiatives working together within our Berlin Peace Coordination (FRIKO), extend our warmest greetings of solidarity to you on this occasion of your events centered around this year's 2010 Review Conference of the Treaty on the Non-Proliferation of Nuclear Weapons.

Disappointed at the results of the new START Agreements, we too are continuing our determined struggle for radical nuclear disarmament. We are lending our support to your Peace Movement there in the USA with our demands for:

- Worldwide abolition of nuclear weapons and their proscription
- As a primary step toward this goal, a radical nuclear disarmament of the USA and Russia
- A halt to every form of modernization of nuclear arms
- A general renunciation of the first use of nuclear weapons
- Punishment for even the threat of using nuclear weapons

We wish you success in your protest actions. On May 1, the international day of struggle of the working class, we will again be taking our demands to the streets in Berlin.

We send you our warmest greetings of solidarity from Berlin.

Laura von Wimmersperg,
Coordinator
